Work Experience:

Analyst II
4S Technologies, Hyderabad, India
June 2022 – May 2024

- Assisted in gathering, analysing and documenting business requirements by collaborating with stakeholders to support project objectives.
- Collected, organised and interpreted business and operational data to support informed decision-making and process improvements.
- Prepared analytical reports, business documentation and presentations to communicate findings and recommendations to management.
- Supported data validation and quality assurance activities to ensure the accuracy and reliability of business information.

Kitchen Assistant

Pestana Chelsea Bridge Hotel, London, UK

May 2025 – Present

- Support kitchen operations by preparing ingredients, maintaining food hygiene standards and assisting chefs during busy service periods.
- Work effectively within a fast-paced team environment to ensure timely food preparation and service.
- Maintain high standards of cleanliness, health and safety, and food handling in accordance with UK hospitality regulations.

Projects:

Project 1

Data-Driven Business Performance Analysis

Tools: Excel | Power BI | Data Analysis | CRISP-DM

- Analysed multi-year business performance datasets to identify revenue trends, customer behaviour, and market opportunities.
- Cleaned and validated large datasets before performing exploratory data analysis.
- Developed dashboards and business reports supporting evidence-based strategic recommendations.

Project 2

Loan Approval Prediction using Python

Tools: Python | Pandas | NumPy | Matplotlib | Google Colab | Machine Learning

- Developed a Python-based data analysis solution for loan application assessment.
- Performed data cleaning, feature engineering, exploratory data analysis and predictive modelling.
- Applied the CRISP-DM methodology and produced visualisations to support business decision-making.

Project 3

AI Strategy for Customer Experience

Tools: Research | AI | Business Strategy | Data Analysis

- Evaluated Artificial Intelligence and emerging technologies for improving customer experience.
- Conducted strategic analysis and developed implementation recommendations for a global organisation.
- Assessed risks, business value and digital transformation opportunities.
