

RAGHU RAM SIRPA

raghuramsirpa@gmail.com | +44 7887182957 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Professional Summary:

Results-driven Junior Data Analyst with 2+ years of experience and MSc Data Analytics in progress, skilled in Python, SQL, Excel, and data visualisation, with a proven ability to analyse large datasets and improve reporting efficiency by up to 30%.

Experienced in customer and financial data analysis using statistical methods and AWS, demonstrating strong work ethic while balancing studies, with a growing interest in UI/UX design to enhance data-driven user experiences.

Technical Skills:

Programming Languages	Python (Pandas, NumPy – Intermediate), SQL (Advanced), R (Basic)
Data Analysis & Tools	Microsoft Excel (Advanced), Power BI, Tableau, Jupyter Notebook
Data Visualisation	Power BI, Tableau, Matplotlib, Seaborn
Databases	MySQL, PostgreSQL, SQL Server
Data Processing	Data Cleaning, Data Transformation, Exploratory Data Analysis (EDA)
Machine Learning	Regression, Classification, Clustering (Basic)
Big Data Technologies	Hadoop (Basic), Spark (Basic)
Cloud & Platforms	AWS (Fundamentals), Google Cloud (Exposure)
Version Control & Tools	Git, GitHub
Statistical Techniques	Hypothesis Testing, Probability, Descriptive & Inferential Statistics
Methodologies	Agile (Scrum), Data-Driven Decision Making

Professional Experience:

Analyst | 4s Technologies | Hyderabad, India Jun 2022 – May 2024

- Performed data analysis using **Python (Pandas, NumPy)** on datasets exceeding **10,000+ records**, extracting actionable insights
- Built data processing pipelines for cleaning, transformation, and analysis, improving efficiency by **30%**
- Conducted **Exploratory Data Analysis (EDA)** to identify trends, correlations, and anomalies in structured datasets
- Automated data workflows using Python scripts, reducing manual effort by **5–8 hours per week**
- Wrote complex SQL queries for data extraction, aggregation, and performance optimisation
- Applied statistical methods (hypothesis testing, distributions) to validate data-driven insights
- Developed visualisations using **Matplotlib, Seaborn, Power BI**, improving stakeholder understanding
- Improved data quality by **20%** through preprocessing, handling missing values, and removing duplicates

Environment: Python (Pandas, NumPy, Matplotlib, Seaborn), SQL, Power BI, Tableau, MySQL, PostgreSQL, Jupyter Notebook, Git, AWS (Fundamentals), EDA, Statistical Analysis

ML Data Associate | Amazon | Hyderabad, India Jul 2024 – Nov 2024

- Processed and analysed large datasets (**10,000+ records**) to support data quality, validation, and machine learning workflows
- Performed data annotation, labelling, and classification tasks to prepare structured datasets for analytical and ML use

- Conducted **data validation and quality checks**, improving data accuracy by **20%** and ensuring consistency across datasets
- Applied **Python (Pandas, NumPy)** for data preprocessing, transformation, and cleaning of raw datasets
- Executed **Exploratory Data Analysis (EDA)** to identify anomalies, inconsistencies, and patterns in data
- Wrote SQL queries to extract, filter, and organise data for downstream analysis and modelling
- Maintained high levels of accuracy and attention to detail while working with large volumes of data
- Collaborated with cross-functional teams to meet data quality standards and project deadlines
- Followed structured workflows and guidelines to ensure compliance with data handling and processing requirements

Environment: Environment: Python (Pandas, NumPy), SQL, Data Annotation & Labelling, Data Validation, EDA, MySQL, PostgreSQL, Jupyter Notebook, Excel, Git, AWS (S3, EC2 – Basic)

Chef (Part-Time) | Hotel Pestana Chelsea Bridge | London, UK

Jan 2025 – Present

- Operate in a high-pressure, fast-paced environment, maintaining efficiency and quality standards
- Demonstrate strong time management and adaptability while balancing postgraduate studies
- Collaborate effectively within a team to ensure smooth operations and customer satisfaction

Working part-time to support personal financial commitments while completing MSc studies, demonstrating resilience, discipline, and a strong work ethic.

Education:

MSc Data Analytics | BPP University | London, UK

Jan 2025 – Present

- Developed strong expertise in data analysis, statistical modelling, and business intelligence
- Gained hands-on experience in Python, SQL, data visualisation, and machine learning techniques
- Completed modules including Data Driven Decisions, Programming for Data Analysts, Big Data & Cloud Computing, and Applied Modelling & Visualisation
- Applied analytical skills to real-world business problems through academic projects

Projects:

Customer Experience Analysis – Amazon (Academic Project)

- Analysed customer behaviour data to identify key satisfaction drivers and engagement patterns
- Segmented target users (busy professionals) to generate actionable business insights
- Developed data-driven recommendations to improve customer retention and experience
- Used data visualisation tools (Power BI/Tableau) to present insights effectively

Tesla Loans Data Analysis (Python Project)

- Analysed financial dataset (**5,000+ records**) using Python (Pandas, NumPy)
- Performed data cleaning, transformation, and exploratory data analysis (EDA)
- Identified loan approval trends and financial risk indicators
- Improved data processing efficiency by **30%** through optimised workflows

Data Quality & Cleaning Analysis (DDDB Project)

- Identified missing values, duplicates, and inconsistencies within datasets
- Applied data preprocessing techniques to improve data accuracy by **20%**
- Prepared clean datasets suitable for business intelligence and analytics
- Ensured data integrity through structured validation processes

Bank vs Salesforce Reconciliation (Excel Project)

- Reconciled **1,000+ financial transactions** across systems
- Identified discrepancies including duplicate records, date mismatches, and incorrect amounts

- Achieved **95%+ accuracy** in reconciliation process
- Improved financial data reliability and reporting accuracy

Big Data & Cloud Analytics (Academic Project)

- Worked with large datasets using big data concepts and cloud platforms (AWS basics)
- Applied data storage and processing techniques for scalable analytics
- Explored cloud-based solutions for handling high-volume data

Predictive Modelling & Visualisation Project

- Applied machine learning techniques (regression/classification) to predict outcomes
- Used Python and statistical methods for model building and evaluation
- Visualised results using charts and dashboards to support decision-making

Covid Care (E-commerce Platform)

- Designed and developed a web-based platform for COVID essentials (masks, sanitisers, medical supplies)
- Focused on usability, accessibility, and efficient product delivery workflows
- Applied problem-solving and system design principles to address real-world needs
